65" INTERACTIVE TOUCH DISPLAY

“The etched glass not only defuses the light, increasing readability but also makes touch movements smoother; essential when there are six touch points”

EASY ACCESS FRONT CONTROLS AND PORTS

Connect your laptop directly to the Interactive Touch Display with no fuss.

EASY TO MOVE THANKS TO OPTIONAL TROLLEY STAND

Either install onto a classroom wall or invest in a fully portable trolley stand - allowing for improved diversity. Use in any classroom you like or even the assembly hall for playing DVDs.

YOUR FINGER BECOMES THE MOUSE

Use your finger, stylus or anything else as your cursor. Also supports multi-touch, much like a smart phone, creating a whole new opportunity for group learning and interaction.

MULTITUDE OF ADVANTAGES OVER PROJECTORS

Sharper image and greater contrast provide drastically superior readability and doesn't take its toll on your eyes. Also designed to last 16 times longer than most projector lamps and doesn't create annoying shadows.

RUNS FROM INTERNAL PC OR LAPTOP

You can either run the Interactive Touch Display directly from your laptop or invest in an internal PC.

ENVIRONMENTALLY FRIENDLY LED BACKLIGHT

LED backlights offer improved brightness, contrast, lifespan and power consumption. Unlike other forms of light this technology is mercury free; making it even more eco-friendly.
